Wash & Care Vacuum or wipe clean routinely with a microfibre cloth lightly dampened with cold water only. Soak up spillages as soon as possible with an absorbent dry cloth to prevent staining. Remove body fluids and extreme soiling immediately (within 15 minutes) with cold water then apply approved infection control protocol: Haz Tabs, Chlor Clean or Shieldplus™ etc. As the concentration of bleach can vary greatly among proprietary brands we recommend these be avoided. Remove product residues and then dry with clean absorbent cloth. Do not steam clean - heat seals in stains. Do not tumble dry. Do not dry clean. Do not fully immerse in water. Do not apply solvents, alcohol or any other chemical cleaners. |
